Thank you for purchasing this Novopro product.

Unpacking and safety Please unpack your new product carefully. Your product should reach you in perfect condition. Please check that no damage has occurred during transit. If any damage is found, **please contact the retailer you purchased it from immediately.**

Packing list

A: 1 x ASP2 speaker pole with auto-lock ratchet system

B: 1 x instruction manual (this document)

The Novopro ASP2 speaker pole has been designed for ease of use as well as safety. The pole has an integral auto-lock ratchet system which allows you to adjust the height and lock the pole to that height without the usual slipping and hassle of standard speaker poles.

Insert the base of the pole into any standard 35mm speaker socket (for example - the top of a bass speaker).

Height adjustment

Unlock the pole mechanism by loosening the thumb screw by rotating it anti-clockwise. Now press the auto-lock ratchet button (see diagram below). **At the same time**, pull the upper pole upwards.

When the pole has reached your desired height, release (let-go-of) the auto-lock ratchet button and tighten the thumb screw by rotating it clockwise. This will **lock** the pole at the height you need.

To reduce the overall height of the pole, begin by removing the speaker and then loosening the thumb screw by rotating it anticlockwise. Next press the auto-lock ratchet button whilst at the same time supporting the weight of the top pole. The upper pole will now lower down by gravity. When the pole reaches your desired height, release (let-go-of) the auto-lock ratchet button and tighten the thumb screw by rotating it clockwise. This will **lock** the pole into place at your required height.

The pole will now be sufficiently stable but due diligence and appropriate safety measures must be implemented and adhered to within public areas. It is the user's responsibility to use the product in a safe manner and within current Health and Safety Guidelines.

Specifications

Height: 880mm – 1330mm / 34.6 inches

Maximum load: 60Kg / 132lb

Material: Ø 35mm / 1.37 inches aluminium pole and steel outer pole

Surface and colour: black powder coated

Weight: 1.05Kg / 2lb 5oz
