# Moonbulb 1

I N S T R U C T I O N M A N U A L

Manual version 1.0

**This user manual will help you operate this product safely and quickly, so please spend a few minutes to read through the enclosed information.**

IMPORTANT - before you begin, turn OFF the power switch to your light socket before removing your existing light bulb and installing the Novopro Moonbulb 1. Then simply plug the Moonbulb 1 into your light fitting (e.g. table lamp, ceiling light) and turn ON the mains power. The bulb will light up and project multicolour light effects.

You have been supplied with a BC (bayonet cap) adaptor in the box. If your chosen light fitting doesn't fit the standard ES (Eddison screw) fitting, screw the Moonbulb 1 into the BC adaptor and then insert this into your light fitting. DO NOT OVERTIGHTEN as this may damage the unit. Always turn the mains power OFF before inserting ANY light bulb.

Please note: the Moonbulb 1 is NOT suitable for dimmer switches or remote fixtures. Always use this product in a well ventilated area. There are no user service parts inside this unit and the product should not be dismantled or tampered with in any way. All Novopro products are thoroughly quality checked prior to despatch but should you have any queries or questions, then please contact your place of purchase. If this product is ever no longer functional please take it to a recycling plant for environmentally friendly disposal.

Due to continuous product development, please check for the latest version of this product manual at:
